CRISTAL MORPHOLOGIC - SERUM

Morpho-Filling Serum

The cushiony serum combines the power of remodelling micronized tourmaline with collagen stimulator rice peptides. It fills in face volume for a younger face morphology. The wrapping texture locks in water droplets containing the actives. Upon application, the formula rolls under the fingers for an ultra sensorial feeling.

One size available
50ml

REMODELING PROTOCOL

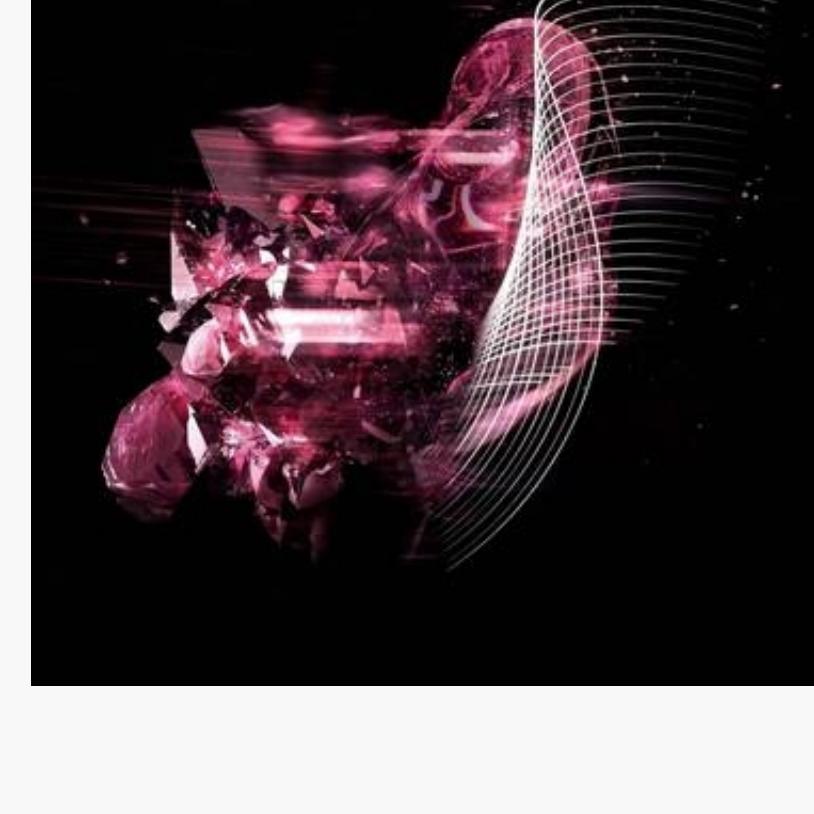

The serum has scientifically proven filling and firming efficacy.

- Fill in face volume
- Reduce wrinkles and fine lines
- Firm the skin

ULTRA SENSORIAL CUSHIONY TEXTURE

Its ultra-sensorial texture forms an "enveloping cushion" on the skin. A gelified net locks in water droplets containing the actives. The formula rolls under the fingers upon application for an incomparable bouncy effect on skin.

COLLAGENIC MICRONIZED TOURMALINE INSPIRED BY FAR INFRARED SCIENCE

Far Infrared are a specific part of the light spectrum. It is known to improve the quality of the epidermis and the structure of the skin.

BIOACTIVE JEWELRY

Described for its far-infrared properties, our precious pink tourmaline comes from Brazil. Derived from the cutting of jewelry stones, tourmaline is micronized into thin particles of less than 20µm in order to incorporate them into our formulas.

REMODELLING COLLAGENIC EFFICACY

The results of our study on skin explants show that the application of tourmaline increases the expression of collagens IV and VII, which play a role in skin tone and resilience.
